

FUMC Council Meeting
March 21, 2011
Trustees Report

A spring meeting for lawn care volunteers is being planned. Anyone that would like to be a part of this group should turn their name into the office.

US 231 construction has started. State highway 26 will remain open during construction.

An easement for underground electrical lines is being given to Duke Energy. This will eliminate them from putting 3-5 poles across the front of our property.

Vectren Energy bored new lines under Highway 26 last week. They replaced our supply line and valve.

We now have Comcast Business Class cable internet, phone, and TV. The TV is not currently hooked up, but the nursery is being considered as a location.

Julie McClure has been hired to cover Joanna Cooks work shift. Julie is just temporary. Please thank her for a job well done.

Gutters are being cleaned this week. Additional ice/snow stops are being studied for the roof.

Five more of the original toilets have died and have been replaced.
